

BINA AGARWAL

BEYOND FAMILY FARMING: GENDERING THE COLLECTIVE

In 2016 the United Nations launched the Sustainable Development Goals as a “universal call to action, to end poverty, protect the planet, and ensure that all people enjoy peace and prosperity.” Among the key elements of these Goals are food security, sustainable livelihoods, and social inclusion. However, little attention has been paid to the institutions needed to deliver these Goals. In the tenth Annual Balzan Lecture, Bina Agarwal, 2017 Balzan Prizewinner for Gender Studies, argues that the

institutional transformation of agriculture is essential for increasing farm productivity, improving farmer welfare, and enhancing gender equality. In particular, she draws attention to the need for a model of farming that transcends the small family farms that dominate agriculture globally. Agarwal has been researching this issue for several years, and her Balzan Prize is funding a research project that further extends this work. The tenth Annual Balzan Lecture presents some aspects of these findings.

Bina Agarwal, vincitrice del Premio Balzan per i Gender Studies, ci mostra come un modello di agricoltura che ‘superi’ il modello dominante della fattoria “familiare”, possa trasformare le strutture stesse dell’agricoltura, aumentando la produttività della fattoria, migliorando il welfare degli agricoltori e la parità di genere. Il Premio Balzan alla lunga ricerca portata avanti da Agarwal (molti dei quali risultati erano stati già presentati alla decima Annual Balzan Lecture) contribuirà a finanziare un progetto futuro inteso come estensione del presente lavoro.

BINA AGARWAL is Professor of Development Economics and Environment at the Global Development Institute, University of Manchester. The many distinguished teaching and research positions she has held include Harvard, Princeton, and the New York University School of Law. She has been President of the International Society for Ecological Economics, Vice President of the International Economic Association, President of the International Association for Feminist Economics, and she has served as board member of the Global Development Network, the United Nations Committee for Development Policy (New York) and the United Nations Research Institute for Social Development (Geneva). She is currently a member of the International Panel of Experts on Sustainable Food Systems (IPES-Food), and on the editorial boards of many academic journals. She holds honorary doctorates from the Institute of Social Studies in the Netherlands and the University of Antwerp in Belgium, and is a Fellow of the Indian Association for Agricultural Economics, a Member of the Accademia Nazionale dei Lincei (Rome), and an Officer of the Order of Agricultural Merit of the Government of France.
